PUSH THEM OUT!**

IMPROVE THE HEALTH OF YOUR HOME!

A BREATHING HOME IS A HEALTHY HOME

AMERICAN LUNG ASSOCIATION

According to the ALA, research shows that airflow and ventilation can alter how diseases spread indoors. To keep the air safe indoors, fresh outdoor air is needed to dilute these indoor pollutants.

CENTERS FOR DISEASE CONTROL AND PREVENTION

Per the CDC, one of the four best things you can do for your home as it concerns the recent COVID-19 outbreak is to increase ventilation by opening windows.

PROTECT YOUR HEALTH

Airborne pathogens, dust, dangerous gasses, and smoke can plague your house. A/C simply conditions that polluted air in your home. QuietCool gives your home a breath of fresh air while flushing out all airborne pathogens that can make you and your family sick.

HOW IT WORKS

1. Open a few windows any time it's cooler outside than inside, typically in the morning and evening.
2. Turn your QuietCool fan on by setting the speed and timer
3. QuietCool pulls in cool, fresh air from outside and expels hot, stale air out attic vents
4. Your home has now been made cooler, healthier, and more comfortable
